

DES-X™

INSECTICIDAL SOAP CONCENTRATE

Collaborator: University of Sinaloa

Location: Culiacán, Mexico

Test Methods

Test Species: Whitefly (Family Aleyrodidae)

Crop: Zucchini (Jacobo variety)

Trial Date: 2010

Evaluation Interval: 3 and 7 days after each treatment application

Method Description: Field trial. A total of three treatment applications were made, and the mean number of nymphs or adults present per square inch of leaf was assessed. Each treatment consisted of 4 replicates.

Conclusion: Des-X is as effective as the commercial standard but is OMRI Listed and MRL Exempt*.
