

# ANTIXX

## FIRE ANT BAIT

Has the efficacy of synthetic products and the benefits of sustainable control.

**ANTIXX FIRE ANT BAIT** is readily taken back into the nest as food for the colony. The active ingredient in the bait is distributed throughout the colony, killing the ants, including the queen. Ants that consume the bait will appear sick and lethargic within 12 to 24 hours. Dead ants will be seen near treated mounds 24 to 36 hours after application. The entire colony, including the queen, will usually be controlled within 3 to 4 days after treatment.

### Active Ingredient

Spinosad (a mixture of spinosyn A and D)  
0.015%

### Mode of Action

**SPINOSAD:** Spinosad has a unique mode of action that excites the insect nervous system, which leads to involuntary muscle contractions, tremors, and finally paralysis and death. Spinosad has both contact and ingested insecticidal toxicity.

### Use Sites

Home greenhouses and gardens, lawns and other turfgrass areas, non-crop areas such as roadsides, industrial areas, parks, and farmsteads, recreation areas including golf courses, playgrounds, and playing fields.

### Application Information

Apply as a broadcast or mound treatment when ants are active. 1 lb treats up to 17,000 square feet (2.5-5 lbs/acre).

### Pests Killed

Attractive and deadly to foraging red imported fire ants (*Solenopsis invicta*) and harvester ants.

- 1 lb. covers up to 17,000 sq. ft.
- Kills the queen
- Kills the mound
- Spinosad is derived from a naturally occurring soil bacterium.
- May be used as part of an Integrated Pest Management program
- Controls fire ants and harvester ants for up to 2 months
- Dead ants in 24 hours
