

# FERROXX<sup>®</sup>

SLUG AND SNAIL BAIT

Active Ingredient: Sodium Ferric EDTA 5.0%  
Restricted Entry Interval: 0 Hours  
Pre-Harvest Interval: 0 Hours

FERROXX<sup>®</sup> is an iron-based bait that is effective against a wide variety of slug and snail species. The unique formula works quickly, is easy to use, can be used around pets and wildlife, and is MRL exempt\*.

## Mode of action

Chelated iron is incorporated into a unique bait formulation; the iron is released at a given location in the mollusc's gut, causing death.

When slugs and snails ingest the bait, they stop feeding, crawl back to their shelters, become less mobile, and begin to die. Ingestion, even in small amounts, will cause them to cease feeding. This effect gives immediate protection to plants. Dead slugs and snails may not be visible as they often crawl away to secluded places.

## Use Sites

FERROXX has been registered for a broad range of sites, including vegetables, fruits and citrus, berries, herbs, field crops, artichokes, ornamentals, greenhouses, nurseries, commercial turf and sod, golf courses, grass for seed, and non-crop areas.

## Reduced Risk

FERROXX is exempt from the requirement for a tolerance when used as a molluscicide in or on all food commodities, which allows for flexibility when exporting to a variety of international markets.

FERROXX can be used in areas where pets and wildlife protection are a concern.

## Pests Affected

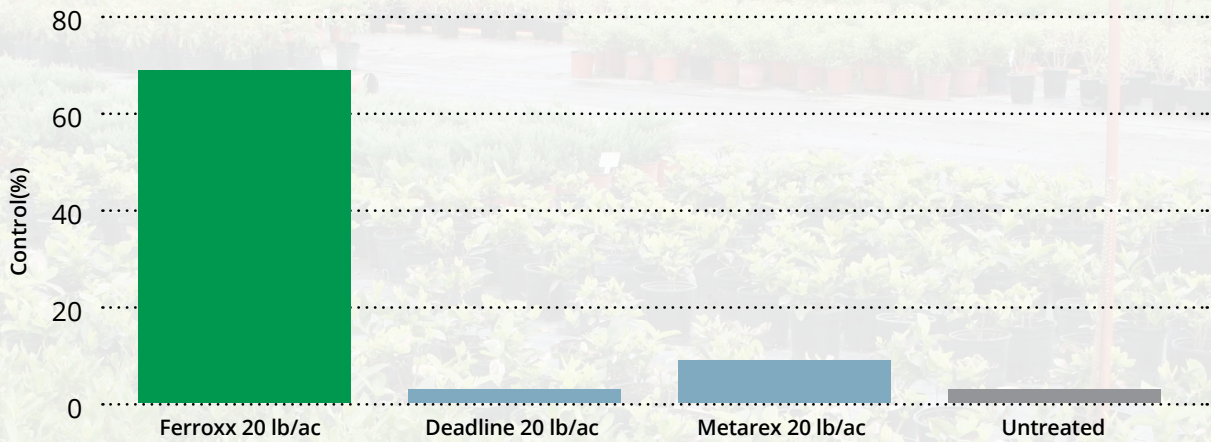

The slugs and snails controlled by this product include (but are not limited to): *Deroceras reticulatum* (Gray field slug), *Deroceras laeve* (Marsh slug or meadow slug), *Arion subfuscus* (Dusky slug), *Arion circumscriptus* (Brownbanded Arion), *Arion hortensis* (Black field slug or Garden slug), *Arion rufus* (Large red slug), *Arion ater* (Large black slug), *Limax flavus* (Yellow cellar slug or yellow garden slug), *Limax tenellus* (Slender slug), *Ariolimax columbianus* (Banana slug), *Helix spp.* (snail species), *Helicella spp.* (snail species), and *Cepaea spp.* (snail species)

## Advantages

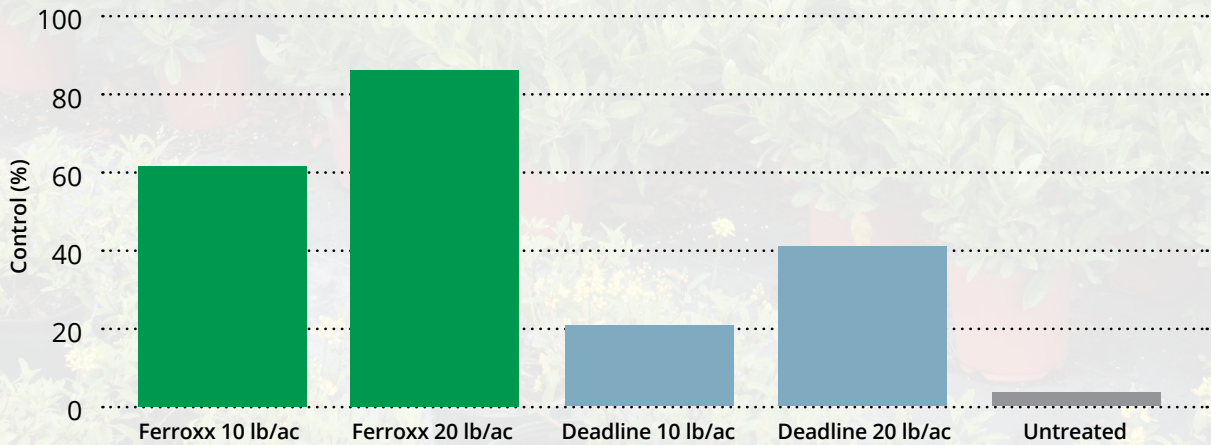

- Micropellet™ technology delivers better coverage and uniform distribution
- 3 times as many pellets per pound compared to competitor
- Rainfast formula provides superior activity in moist conditions
- Easily blends with granular fertilizer
- Shelf life of 5+ years
- Will not harm earthworms

**Control of Helix snails in the field 26 days after treatment  
(Uber, California, 2011)**

**Control of snails in citrus 14 days after treatment  
(Holden, California, 2011)**
