Scorpio[®] Ant and Insect Bait delivers powerful performance and maximum control in ready to use ant baits.

Scorpio[®] Ant and Insect Bait contains spinosad, which is derived from the fermentation of a naturally occurring soil dwelling organism. Scorpio Ant and Insect Bait may be used as part of an Integrated Pest Management (IPM) program for the suppression, control or elimination of a wide variety of pests.

How it works

Spinosad affects the insect nervous system, causing muscle contractions and paralysis, eventually leading to insect death. Spinosad has both contact and ingested insecticidal toxicity.

Where to use it

Berries, fruits including grape, leafy vegetables, potatoes, sweet potatoes, onions, sweet corn, legumes, lawns, ornamentals including container grown ornamentals, flowers, and trees. Suitable for use in fields, around the perimeter of buildings, in and around greenhouses.

What it controls

Controls multiple ants including fire ants, foraging ants, sweet-feeding ants, pavement ants, citronella ants, moisture ants, little black ants, argentine ants, crazy ants, acrobat ants, cornfield ants, ghost ants, odorous house ants, thief ants and field ants. Also controls black cutworms and earwigs, suppresses spotted wing drosophila, onion maggots and cabbage maggots and reduces damage from wireworm.
