Active Ingredient: Spinosad (a mixture of spinosyn A and spinosyn D) 0.07% REI: 4 hours

OMRI Listed

Seduce[™] soil insect killer contains Spinosad in a pelletized, soil-applied formulation that requires no mixing or spraying. Seduce can be used around fuits and vegetables, ornamentals, flowers, and other sites, on conventional and organically produced crops. Seduce is listed by the Organic Materials Review Institute.

Mode of Action

Spinosad affects the insect nervous system, causing muscle contractions and paralysis, eventually leading to insect death. Spinosad has both contact and ingested insecticidal toxicity.

Pests Affected

Ants including foraging ants, sweet-feeding ants, pavement ants, moisture ants, little black ants, argentine ants, crazy ants, acrobat ants, bigheaded ants, cornfield ants, ghost ants, odorous house ants, thief ants, Texas leafcutting ants, and other common ants (excluding fire ants, harvester ants, Pharaoh's ants and carpenter ants), earwigs, and cutworms.

Use Sites

Berries, fruits including citrus, vegetables, tree nuts, peanuts, pistachios, herbs, grass grown for seed production, cereal grains, turf, ornamentals, flowers, and trees. Suitable for use in fields, gardens, and greenhouses.

Reduced Risk

Seduce contains Spinosad, which is derived from the fermentation of a naturally occurring soil dwelling organism. It is listed by the Organic Materials Review Institute (OMRI) for organic production. Seduce may be used as part of an Integrated

Pest Management (IPM) program for the elimination of ants, earwigs, and cutworms. People and pets can enter the treated area after application.

It is a violation of Federal law to use this product in a manner inconsistent with its labeling. Read the entire label before use.
